

## Digital Passports

An exciting new resource for caring families and professionals.

Complex needs require information to be personalised, rich and visually engaging. Digital Passports are hand-held e-books stored on tablet devices.

Each passport details individual needs by covering:

- social, emotional and physical care
- communication
- medical care procedures
- assessment tools
- videos, pictures and sounds

Our digital initiatives are part of the reason we won a Glaxo-Smith Kline IMPACT Award.

We are committed to improving the lives of people with profound and multiple learning disabilities, and their families.

Our Digital Passports are one of the resources we have been developed to address some of the challenges around education, health and social care needs. We want to make the biggest impact possible by reaching out to other groups representing those with a range of complex healthcare needs.

### Practical uses of the Digital Passport include:

- communicating between school and home about education
- enabling health care needs to be communicated between families and the wider multi-disciplinary team (e.g. GPs and consultants)
- supporting care services to understand the needs of the individual.

If you are interested in PAMIS' training opportunities, and would like to develop these resources within your organisation, please get in touch with Hannah Young on **01382 384 942** or by e-mail at [h.young@dundee.ac.uk](mailto:h.young@dundee.ac.uk).
