attendees**

**£95
per person**

**£1425
in house**

1 day

About the Course

Learn about Sensory Processing Challenges and how they affect behaviour; basic neuro-science and how the sensory system works and the challenges people face when the sensory systems are inefficient. Identify the possible sensory reasons for the behaviours that the person with sensory processing issues may be displaying and learn strategies to prevent the behaviours. Gain a better understanding of the challenges people with PMLD face and expand your knowledge and awareness of commonly used communication approaches. Participants will increase confidence in ability to interact with people who do not communicate verbally.

At the Course

Generally this one day course will run from 09:30 to 16:00

Lunch, tea and coffee provided

All participants will gain access to the PAMIS online Learning Hub for additional resources and further discussion
